

Automatic Lattice Adjuster Kit

Menu driven keypad controller

Part # 31086 Automatic Lattice Adjuster Kit

Automatic lattice adjuster provides the following:

- Precise motorized slice thickness adjustment
- Manual jog adjustment of slice thickness
- Automatic blowout of the lattice during slice adjustment

Automatic adjustment within your lattices' standard slice width range. Simply choose the appropriate control panel button for desired slice width; air blast comes on and continues as the lattice is expanded and then moves to the width setting entered.

The automatic lattice adjuster kit comes complete with all necessary components, mounting hardware, wiring and installation instructions and diagrams.

We are s/l/i/c/e/d bread!
