

Automatic Bag Changer

Part # 46538 Automatic Bag Changer

The Automatic Bag Changer incorporates a rodless air cylinder to move the wicket holder right and left and two oversized flat air cylinders to move the bag table up and down. Bag changing is done automatically when an empty wicket signal is received, or by pressing a button.

This Kit comes complete with installation instructions and diagrams.

**Adding the Automatic Bag Changer
to your current machine
reduces your downtime,
therefore increasing your productivity!**
